**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-11, drawn to an apparatus for occluding a defect, classified in class 606, subclass 151.
  - II. Claims 12-18, drawn to a method for occluding a defect, classified in class 606, subclass 151.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as the apparatus of invention I can be used with a process of occluding a body cavity other than a defect in the annulus fibrosis of a spinal disc.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. John Posa on 9/26/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3731

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
